High ambition alliance on chemicals and waste

Established July 2018 New York

**High
Ambition
Alliance**
chemicals & waste

Why a High ambition alliance

- The 2020 target is far from being fulfilled
- Complex Global value chains, increased production and use of chemicals.
- Chemicals with hazardous properties spread globally in products, by air and in water
- Need to find new global ways of managing the risks associated with chemicals- Beyond 2020 offers that opportunity.

**High
Ambition
Alliance**
chemicals & waste

Aim of High ambition alliance

To support an ambitious outcome of the Beyond 2020 process aiming to **protect from harm** and to contribute to **Sustainable Development** including safe Circular economy and support through a UN general assembly resolution

To raise **awareness on the need to act** on chemicals and waste both nationally and internationally.

**High
Ambition
Alliance**
chemicals & waste

Who can join

The Alliance is now established.

Governments and other stakeholders that shares the narrative and vision are invited to join.

Next steps

Sound chemicals and waste management contribute to the implementation of numerous goals in the 2030 Agenda.

To advance the circular economy, information and knowledge is needed and innovation is key.

Innovation and private sector are important players to advance the process.

A strong framework is important to developing countries and economies in transition, for a successful implementation.
